

# 1. GRAPHICAL USER INTERFACE (GUI)

At this point we will study the parts of the graphical user interface. These parts are:

Graphical user interface.

## A. Scroll bar

**Function:** Scroll in a predetermined direction (up, down, left, or right) on a computer display, window, or viewport so that all of the content can be viewed.

**Translation:** Barra de desplazamiento

Scroll bar

## B. Title bar

**Function:** Display the title of the software, name of the current document, or other text identifying the contents of that window.

**Translation:** Barra de título

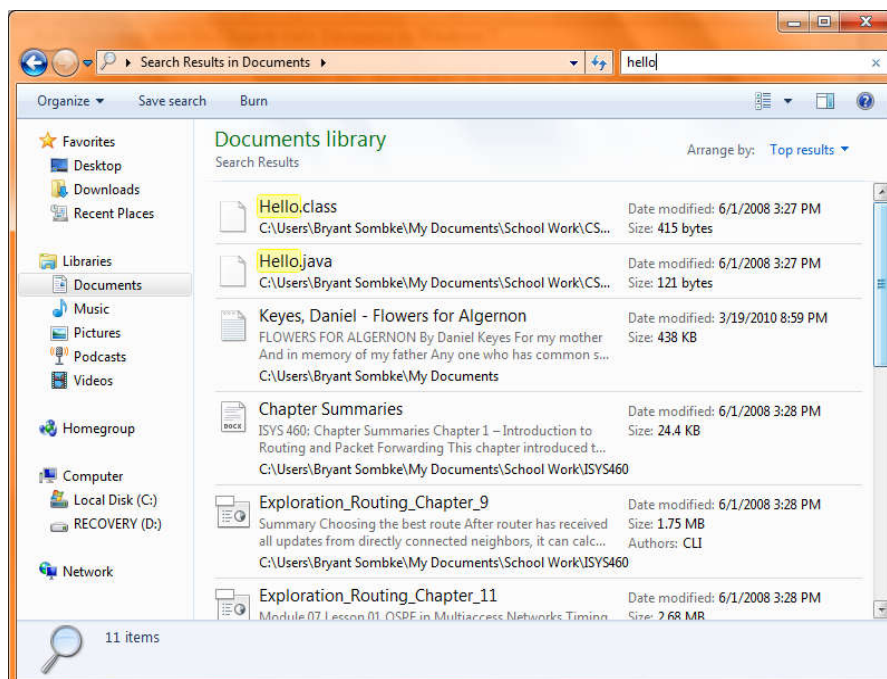

Title bar

## C. File

**Function:** Store data.

**Translation:** Archivo

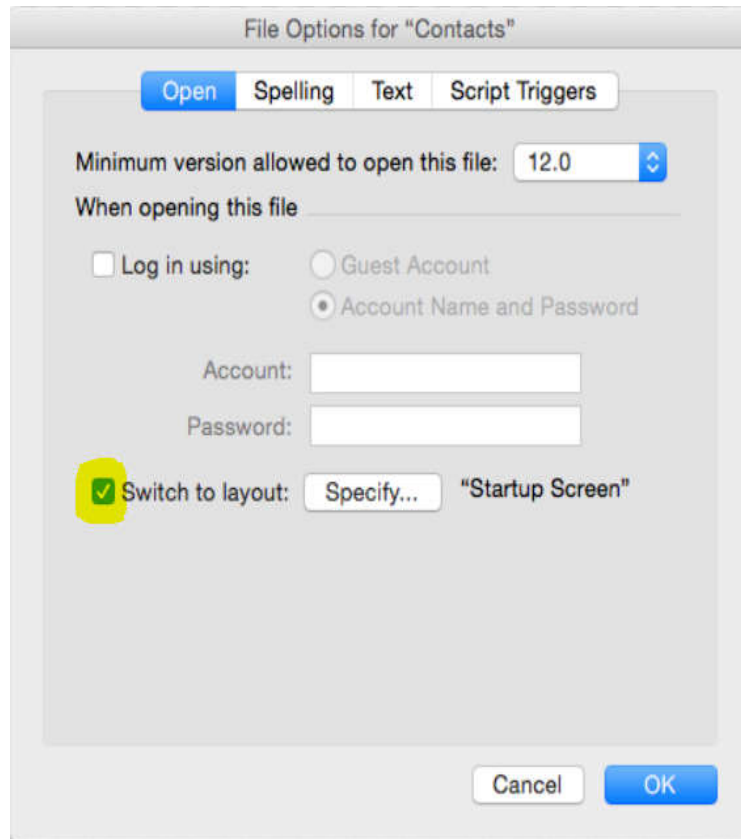

File

## D. Check Box

**Function:** Permits the user to make a binary choice.

**Translation:** Casilla de verificación

Check Box

## E. Tab

**Function: Allow** multiple documents or panels to be contained within a single window.

**Switching** between them.

**Translation:** Pestaña

Tab

## F y G. Minimise/ize - Maximise/ize buttons

**Function:**

Max → expand the window to cover the whole screen.

Min → disappear into the taskbar at the bottom of the screen.

**Translation:** Botones de minimizar y maximizar.

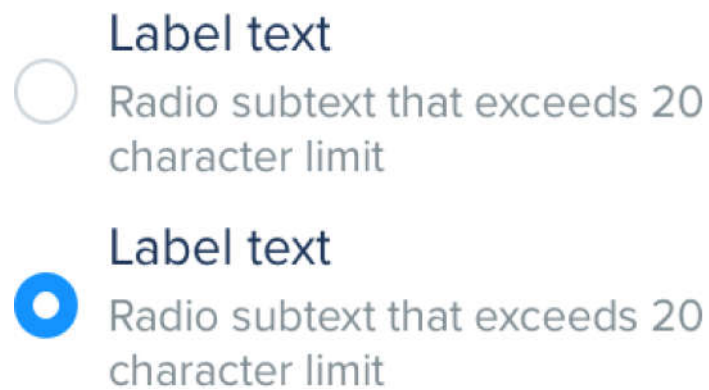

Maximise/ize button

## H. Radio button

**Function:** Choose only one of a predefined set of mutually exclusive options.

**Translation:** Botón de opción o de radio

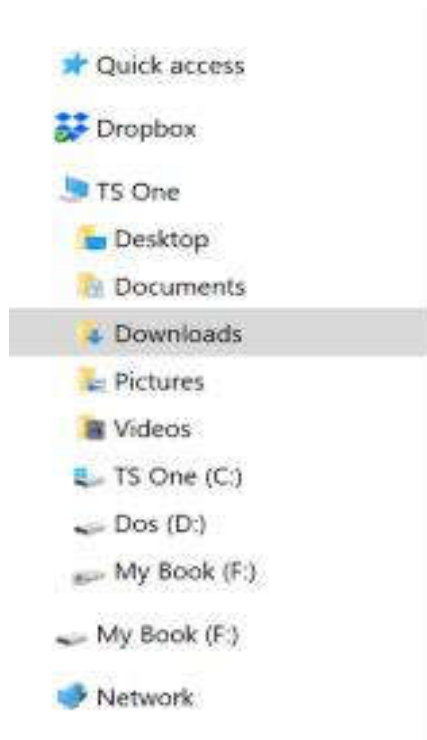

Radio button

## I. Left-hand pane

**Function:** Contains shortcuts to each main folder.

**Translation:** Menú lateral de navegación

Left-hand pane

## J. Folder

**Function:** Store and organize files and data in the computer.

**Translation:** Carpeta

Folder

## K. Icon

**Function:** Help the user navigate a computer system.

Serve as a shortcut to access other programmes or data.

**Translation:** Icono

Icons

## 2. HARDWARE & IT JOBS

At this point we will study the devices that make part of a computer.

### 1. Monitor

**Function:** Displays information processed by the computer's video card.

**Translation:** Monitor

Monitor

### 2. Case

**Function:** Contains the components inside of a computer.

**Translation:** Torre/Carcasa/Caja

## Case

### 3. Motherboard

**Function:** Provides connectivity between the hardware components.

**Translation:** Placa base

Motherboard

### 4. CPU (or Processor)

**Function:** The brains of the computer where most calculations take place.

**Translation :** Unidad central de proceso, CPU o procesador.

CPU

### 5. RAM memory

**Function:** Stores data for short-term use.

Optical disc drive

## 8. Hard disc drive (HDD)

**Function:** Stores data for long-term use.

**Translation:** Disco duro

HDD

## 9. Keyboard

**Function:** Used to enter characters and functions into the computer system.

**Translation:** Teclado

Keyboard

## 10. Mouse

**Function:** Moves the cursor.

**Translation:** Ratón

Mouse

### 3. SOFTWARE

Software can be classified depending on its functionality. There are three types of software:

- System
- Programming
- Application

#### 1. System software

**Function:** Helps the user, hardware, and application software to interact and function together.

**Translation:** Software de sistema

<b>Operating system</b>	<b>Software that manages computer hardware, software resources.</b> <i>Windows 10, Ubuntu, Mac OS</i>
<b>Device drivers</b>	<b>Operate or control a particular type of device.</b> <i>Printers, video adapters, sound cards, mice, keyboards</i>
<b>Utilities</b>	<b>Analyze, configure, optimize or maintain a computer</b> <i>Data recovery, disk checkers, disk defragmenters, backup software</i>

## 2. Programming

**Function:** Create, debug, maintain, or otherwise support other programs and applications.

**Translation:** Software de programación

<b>IDE</b>	<b>Software for building applications that combines common developer tools into a single graphical user interface</b> <i>Eclipse, NetBeans, Microsoft Visual Studio</i>
<b>Source code editor</b>	<b>Text editor program designed specifically for editing source code of computer programs.</b> <i>Notepad++, Gedit</i>
<b>Compiler</b>	<b>Translates computer code written in one programming language into another language</b>
<b>Interpreter</b>	<b>Executes instructions written in a programming or scripting language</b>
<b>Debugger</b>	<b>Finding and resolving defects or problems within a computer program that prevent correct operation.</b>

## 3. Application Software

**Function:** Help people perform an activity.

**Translation:** Software de aplicación. Aplicación

<b>Word processing</b>	<b>Create word sheets and documents.</b> <i>Word, WordPad, Notepad</i>
<b>Spreadsheet</b>	<b>Compute quantitative data.</b> <i>Excel, Numbers</i>
<b>Database</b>	<b>Store data and sort information.</b> <i>Oracle, MS Access</i>
<b>Application suites</b>	<b>Collection of related programs sold as a package.</b> <i>OpenOffice, Microsoft Office</i>
<b>Multimedia</b>	<b>Tools used for a mixture of audio, video and image.</b> <i>VLC player</i>
<b>Communication</b>	<b>Connect systems and allow text, audio &amp; video comm.</b> <i>Skype, Discord</i>
<b>Internet Browsers</b>	<b>Access &amp; view websites.</b> <i>Chrome, Opera &amp; Firefox</i>
<b>Email</b>	<b>Send &amp; receive emails.</b> <i>Outlook, firebird</i>
